

Record accounting for the structured critical review

The legacy search syntax and initial database hit counts could not be reconstructed. This diagram is therefore a PRISMA-inspired accounting of retained project inventories, not a claim of PRISMA-complete systematic searching.

* ESR_Singh2025_084 has both a verified-full-text row and a later exclusion-decision row. The full paper-level ledger and all 70-to-57 decisions are provided in Supplementary Table S7.
